
ViseeO | The Best Mercedes Bluetooth Car Kit

ViseeO | The Best Mercedes* Bluetooth Cradle Car Kit

End the Mercedes Benz* Bluetooth connection problem with mobile phones forever

The ViseeO Mercedes Bluetooth hands free mobile phone in car kit cradle allows you to connect almost any Bluetooth mobile phone to a Mercedes Benz.

Connecting mobile phones to Mercedes Benz is a big problem. You can install original cradles for some phones. But your choice of telephones is very small as there are few supported models. Choosing an official phone cradle is also a complex task, as there are so many different cradles.

If you have two drivers, they would need to use the same phone model and type. If you change your mobile phone you need a new cradle. With the official Bluetooth Mercedes cradle you are restricted in your choice of phone and even network connection service provider.

For older cars, where there is a pre-installed fixed cradle, there is no other solution at all! There are 3rd party car kits out there, but none will work with your Comand system. Other solutions need costly installation. In many cases, just the fitting alone costs more than this great device. The cost of your fixed car kit is also lost with the car. With ViseeO, you simply take it with you or sell it on when you don't need it any more.

ViseeO is the ultimate Mercedes car kit, and ends all these problems. ViseeO allows you to connect to almost any mobile phone, with any system (Windows Mobile, Symbian, BlackBerry, etc) and all brands (Nokia, Sony Ericsson, Samsung, LG, iPhone and even iPhone 3G), regardless of your network or carrier!
