
ViseeO | Mercedes Bluetooth Phone Cradle for Mercedes

ViseeO | Mercedes* Bluetooth Phone Cradle for Mercedes

Choose a ViseeO for YOUR car

There are 2 different models of ViseeO Mercedes* Bluetooth phone cradles. The most popular is the ViseeO MBU2000, for virtually any car made from 2005, which use the UHI connector. For older cars, where Mercedes simply does not provided any solution, the ViseeO MBU1000 is the perfect Mercedes Bluetooth phone cradle solution. Please note: Some cars in 2004 had a UHI connector (or a removable phone cradle) and therefore will use the MBU2000.

ViseeO MBU-2000 (cars after 2005 with UHI connector)

Download the ViseeO MBU-2000 User Manual.

- This unit works in almost all cars with a UHI connector, or a UHI connected cradle
- Where you have an existing cradle, simply unclip and remove it
- Plug in the ViseeO MBU-2000, pair your mobile phone, and you're ready
- Once installed, just pair the device in less than 30 seconds, and you'll have clear, echo free Bluetooth hands free communication with the phone of your choice

ViseeO MBU-1000 (cars before 2005 with cradle)

Download the ViseeO MBU-1000 User Manual.

- For use with older cars with a fixed cradle designed cradle for these phones (generally in cars made pre-2005)
 - Nokia 6210
 - Nokia 6150
 - Nokia 6310 / 6310i (Both versions 1 and 2)
- The ViseeO MBU-1000 is the same size and shape as the original Nokia phone

-
- Allows hands-free bluetooth and faultless operation where owners have simply been abandoned by Mercedes Benz, who provide no option or solution at all
 - Other 3rd party solutions often cannot mute the audio, and also require professional installation. The MBU-1000 is just the perfect solution to a huge problem
